REFERENCE

Memorandum for DD/P, dated 21 January 1959, from Deputy Director, DPD-DD/P, same subject (CHAL-

0533)

I have not formally concurred in the referenced document because as I explained to you on the phone, I believe it has been overtaken by events. The proposal to use the J-75 in the U-2 is by all odds the most promising product improvement possibly that has yet appeared. I hope that with 25X1A9a help will pursue this with all possible speed.
